

ISTANBUL, TURKEY, 16 MARCH 2022

## **FIMER TO POWER UP SOLAR ISTANBUL FAIR 2022 WITH ITS INNOVATIVE SOLUTIONS**

**Global renewable energy equipment manufacturer FIMER is preparing to exhibit its innovative solar solutions and EVI technologies at Istanbul Fair 2022, *Solar Energy, Storage, E-Mobility and Digitalization Exhibition Conference*, from 23<sup>rd</sup> to 26<sup>th</sup> March.**

At Solar Istanbul Fair, FIMER will be showcasing its portfolio for the solar and EVI markets including:

- The **FIMER PVS-10/12.5/15-TL** is the three-phase solution, ideal for the optimization of installation and operational costs in commercial and industrial PV plants. This PVS string inverter family, with power ratings of up to 15 kW, has been designed with the objective to maximize the ROI in commercial and industrial applications such as rooftop plants, carports, and trackers. Thanks to the DC-side specifications this new range of three-phase string inverters fits any plant design, in both new and existing installations. Moreover, the built-in advanced communication features ensure an easy integration with the latest technologies, while keeping costs low.
- The **FIMER PVS-50/60-TL** is the cloud connected three-phase string solution enabling cost efficient large decentralized photovoltaic systems for both commercial and utility applications. This addition to the PVS string inverter family, with 3 independent MPPT and power ratings of up to 60 kW, has been designed with the objective to have ease of installation, with horizontal and vertical mounting. Monitoring assets is made easy, as every inverter is capable to connect to Aurora Vision cloud platform to secure profitability in long term.

The **FIMER's PVS-100/120-TL**, all-in-one high-power string inverter, is the best solution for maximum return on investment in large, decentralized ground-mounted or rooftop installations for commercial and industrial applications. With six MPPT, it guarantees greater versatility and capacity to the system, ensuring optimized energy collection even in the presence of shading. Fully integrated with the FIMER digital platform, it provides advanced functionalities like remote monitoring and export limitation control.

- The **FIMER FLEXA** range of EV charging stations in both wallbox (AC Wallbox) and on-street terminal (AC Station) versions, is designed to meet the diverse needs of users, who are seeking solutions for private, public and commercial use. The **FIMER FLEXA AC Station** meets different needs: in fact, it represents the best solution to be installed in private parking sites such as in a building or in a company parking lot, or in public use parking lots. The **FIMER FLEXA AC Wallbox** is an EV charging device for private applications and for public or company car parking facilities, which can be easily installed on a wall or on a dedicated FIMER FLEXA Stand Basic. FIMER FLEXA Wallbox is made from **100% recycled materials**.

**Emrah Güvercin, Country Sales & Marketing Manager at FIMER Turkey**, comments: *“We are happy and honoured to welcome our valuable guests at our booth E-08 to find the most suitable solutions for every kind of projects and needs. You will have the opportunity to meet FIMER team and to get information about our full after-sales services.”*

**FIMER** experts will be available to discuss its wide range of innovative solar and electric mobility platforms at **booth E-08** at **Solar Istanbul 2022**, Tuzla Via Port Marina / Istanbul.

### About FIMER

**FIMER** is the fourth largest supplier of renewable energy equipment in the world. Specializing in solar inverters and electric mobility systems, it has more than 1100 employees worldwide and offers a complete portfolio of solar solutions for all applications. FIMER's skills are further strengthened by its bold and agile approach that allows it to constantly invest in R&D. With a presence in over 20 countries as well as local training centers and manufacturing centers, FIMER remains close to its customers and the ever-changing dynamics of the energy industry.
